**Satisfying Transportation Needs  
With Safety First**

For over twelve years, American Camping Association (ACA) Business Affiliate Fleet Solutions has provided new and late model passenger vans to ACA camps throughout the country, meeting their exclusive transportation needs. Fleet Solutions' concept of "Fleets on Demand" is a flexible, viable, and cost-effective method of moving people, which offers camp directors a valuable resource. Fleet Solutions can supply vans from one to as many as may be needed. No project is too big or too small!

**Safety First**

Addressing the concerns of the fifteen-passenger van stability and handling issues is something Fleet Solutions is constantly pursuing. It is with those concerns that General Motors (GM) is announcing a new and revolutionary breakthrough in technology. The 2004 GM models will be equipped with a computer-controlled device known as SMART-TRACK. This system will not allow the driver to overcompensate the turning radius, eliminating roll-over and dramatically enhancing the stability and handling of the vehicle. Fleet Solutions has an exclusive four-year product agreement with GM and anticipates providing many ACA camps with this new, safe, and exciting product. For more details on this new technology, see our exhibit booth at the 2004 ACA National Conference in San Francisco this February or call 800-611-4939.

Fleet Solutions is based in Overland Park, Kansas. For more information, contact Don Thoms, President/CEO at 913-469-8877 or [dthoms@fleetsolutions.com](mailto:dthoms@fleetsolutions.com).

ACA is sharing the above with you for your information only. ACA has not tested nor does it endorse this product or service and assumes no liability for its use.
